

OUTDOOR GAMES

NAME-IT BALL

YOU'LL NEED:

A large open space outside

A large playground ball

3 or more players

Look at the food categories below and use them when you play.

HOW TO PLAY

All players form a circle with enough space between each other. One player selects a category for the round, and they bounce the ball to another player in the circle who must catch the ball and state an item/thing from the category. Once they have named something, they then continue by bouncing the ball to another player in the circle. The play continues this way until someone catches the ball and cannot think of something, takes too long, or repeats an item another player has already mentioned, in which case this player is out of the game.

Can I say tomato for both the fruits and vegetables categories?
